## PROFESSIONAL EXPERIENCE

[Attentions ai](#) [Next.js, Reactjs, AI Agents, Pub-Sub, WebSockets, MCP]

**May 2024 - Present**

### Front End lead | Pune

- Led development of 4 production **micro-frontends** (Artigen, Connect, Docu, Lumina) for AI-driven Q&A, call centers, and e-commerce platforms.
- **Improved app performance by 40% via WebSocket streaming**, markdown rendering, and real-time pub-sub systems.
- Built a modular enterprise Chat SDK with voice support, **AI agent orchestration**, and **MCP connectors for B2B workflows**.
- Collaborated with AI, backend, and design teams; mentored front-end engineers and defined scalable architecture and best practices.

[Coditas](#) [Angular, Micro-frontend, Component library, CDK, Nodejs, Aws]

**June 2021 - May 2024**

### Senior Software Engineer | Pune

- Built **Micro-frontends** in Angular for (Basixs) sales and analytics platform, enabling role-based access (admin, manager, user) and **improving development speed by 25%** with reduced error rates.
- **Developed a custom component library** and design system, accelerating UI development and standardizing design across sister applications.
- Delivered web applications (Ambry) for healthcare and regulated industries, implementing compliance-driven features using Angular, Node.js, Java, and MongoDB.
- Led front-end development for (Medgami), a social networking platform for doctors, delivering responsive and scalable UI experiences.

[Tata consultancy services](#) [Angular,Cordova,JavaScript, material UI]

**July 2017 - June 2021**

### Front End Developer | Pune

- Developed Angular 4–6 SPAs with custom directives and modular routing, integrated with Java Spring Boot backends for enterprise clients.
- Built hybrid mobile apps (Health Monitoring) using Angular, Ionic 3, Cordova, and Redux; implemented WebSocket real-time updates and mobile SQL DB for caching and notifications.
- Created a gamified Employee Management Portal with responsive UI, leaderboard features, and admin controls using Angular 6 and Bootstrap.
- Developed intelligent Ask Twin chatbot using Angular and Microsoft Bot Framework (LUIS), integrated with Azure services to support field engineers.
